

NC GreenPower Program Change

100% of your funds support the installation of solar power in schools.

Thank you for participating in the development of renewable energy through your monthly contribution to NC GreenPower. You can feel proud that you're taking an active role in improving the North Carolina environment now and for years to come.

Currently, a portion of your NC GreenPower contribution supports the production of renewable energy and grants for educational solar PV installations at North Carolina K-12 schools.

We are pleased to announce a change in how this NC GreenPower program works, effective Jan. 1, 2020. NC GreenPower recently received North Carolina Utilities Commission approval to use 100% of NC GreenPower renewable energy contributions (individuals and small businesses) for solar installations at North Carolina K-12 schools. This program modification is NC GreenPower's increased commitment to North Carolina schools and the preservation of the local environment.

The NC GreenPower program will continue uninterrupted and this shift does not change your current contribution level. Also, this change does not affect any other NC GreenPower programs in which you may participate.

To learn more about the NC GreenPower Solar Schools grant program, visit duke-energy.com/NCGreenPower.

Duke Energy does not profit from NC GreenPower. One-hundred percent of the funds collected are transferred to NC GreenPower, which supports local renewable energy, carbon offsets and solar school projects in North Carolina.
